Profile Summary

I am a Software Engineer, a technology enthusiast, a problem solver, and an innovative designer. I hold a bachelor's degree in Mathematics and Computer science majoring in statistics. I am currently self-employed with a keen interest in new challenges that the job market might offer. I am available for software developer, software engineer, or web developer roles.

Skills

Apache Server, GIT & Github, Unix, Bash, C, Java, PHP, Python, Javascript, ES6, TypeScript, VueJS, React & Redux, Laravel, CSS3, Sass, HTML5, etc.

Experience

@ILAB Africa / Software Developer
Sept- 2019 - March-2020, Nairobi

I worked at Strathmore-@iLabAfrica for a period of 7 months. I was interning at the E-Health Department. I would like to proudly state that it was a pleasure working because I enjoyed every day of work. I was a Junior Software Developer part of the team assigned to develop the Hospital Management Information System (HMIS). I worked on two module features of the system using Laravel and VueJs. I also played a role in the development of a crash project dubbed 'Kitui Goat Auction System' sponsored by the Communications Authority of Kenya (CAK).

Education

Kenyatta University / BSC. Math & Computer Science
Sept- 2013 - Dec 2017, Nairobi

Studied Mathematics and Computer Science majoring in Statistics.
